

FS-series Automatic Rotary Liquid Filling machine, Capping and Sealing Machine

The machine is a combination of rotary type volumetric liquid filling machine and ROPP / screw / CRC cap sealing arrangement of glass, PET or HDPE bottles. It ensures immediate capping and does not permit exposure of the liquid enabling a contamination-free filling.

Salient Features

- Can be operated by a single operator.
- Safety hood to prevent flying of glass particles in case of breakage of bottles.
- Rotary valve design for better accuracy of $\pm 1\%$.
- No bottle – no fill arrangement to avoid spillage of liquid.
- No bottle – no cap system to avoid wastage of liquid.
- PLC and HMI system.
- 21 CFR Part II compliance can be provided

Technical Parameters

Model	FS 80	FS 100	FS 120	FS 180	FS 240	FS 300	FS 360
Output (bpm)	40-80	60-100	80-120	80-150	150-200	150-250	150-300
