

Single Chamber Vacuum Packing Machine DZ-260

DZ-260 Single Chamber Vacuum Packaging Machine is a new type of vacuum packaging machinery, it is the bag into a vacuum, after vacuum, immediately automatic sealing, to reach the ultimate vacuum.

DZ-260/PD desktop vacuum machine adopts microcomputer control , with vacuum, sealing, cooling once completed function, different packaging materials and different packaging requirements, the machine vacuum, heat sealing temperature, heat sealing time, etc. Adjust equipment for better packaging results. It is currently an ideal small vacuum inflatable packaging machine. The vacuum machine is made of all stainless steel and transparent plexiglass, making the packaging process clear at a glance. The utility model has the advantages of high vacuum degree, fast vacuum packaging speed, beautiful appearance, compact structure, high efficiency, simple operation and the use of the same size and the same machine. It is a wide range of vacuum packaging machines.

Technical characteristics:

Small size, low power consumption and short pumping time. The product packaged by DZ-260/PD desktop vacuum machine can prevent moisture and mildew and prolong the storage period.

Scope of application:

The DZ-260/PD desktop vacuum machine is suitable for the packaging of small items, and is also suitable for vacuum packaging of currency and financial documents, documents and other information.

Technical parameter:

Model	DZ-260
ultimate vacuum	0.05hpa
vacuum chamber depth	50mm
power supply	220v/50hz
pump capacity	10m3/h
machine size	502x330x380mm
motor powerheat sealing power	0.18kw
sealing length	260mm
shipment dimension	590x405x450mm
Heat sealing power	0.15kw
sealing width	5mm
N.W./G.W	37.2kg/46kg
Machine cycle	20-40 sec
