

DZQ-800B Vacuum Packaging Machine with Stainless Steel Lid

The single chamber vacuum packaging machine is a large-scale vacuum packaging machine designed for sealing composite film packaging materials. It is ideal for continuous, uninterrupted use in large industrial settings, with its stainless steel vacuum cover extending its lifespan.

Product Description

Advantage

- The single chamber vacuum packaging machine can be customized with single, double, or triple sealing strips, tailored for different applications.
- It offers options for stainless steel or acrylic glass covers.
- The sealing strips use a detachable new-style design, making it easy to clean the chamber and replace the heating wire.
- It can be equipped with 20m³, 40m³, or 60m³ vacuum pumps.
- Casters at the bottom allow for easy movement by a single person.
- As a custom model, it can be modified to meet specific customer requirements.
- An optional inflation function is available.

Description

The Vacuum Packaging Machine is an advanced and highly efficient device designed to extend the shelf life of products by removing air and sealing them in vacuum bags. It uses a vacuum chamber to eliminate air from the packaging, ensuring that products are tightly sealed for protection from moisture, dust, and contamination. Ideal for food processing, medical packaging, and industrial applications, this machine helps businesses reduce waste, preserve product quality, and improve packaging efficiency. Its versatility and ease of use make it suitable for both small and large-scale operations.

Technical Parameters

Model	DZQ-800B	
Voltage	110/220/380V 50-60Hz	
Pump Power	1.8kw	
Pump Capacity	20m ³ /h (x2) /Option	
Sealing Length (Option)	1 Seal Bar	800mm (x1)
	2 Seal Bar	600mm (x2)
	2 Seal Bar	800mm (x2)
	3 Seal Bar	800mm (x1) 500mm (x2)
Sealing Width	10mm	
Chamber Size	825x635x100mm	
Dimension	952x775x1010mm	
Certification	CE ISO
