

HL-L460F Vertical Power Packaging Machine

Product introduction:

- Intelligent photoelectric control device ensures the complete pattern of packaging and bag making.
- 304 stainless steel is used for the whole contact material parts and chassis, which meets the food and the drug hygiene licensing standards.
- This machine is suitable for back packing.
- It can be packed with multi-layer composite film, polyester/polyethylene, polyester/aluminum, foil/polyethylene polyester/aluminized/polyethylene, paper/polyethylene, with a wide range of packaging.
- Automatically complete bag making, measuring, filling, sealing, cutting, bagging, counting, printing batch number.

Technical Parameters:

Model	HL-L460F
Bag Length	80-300mm
Bag Width	80-220mm
Packing Film Width	180-460mmm
Packaging Capacity	50-2000ml
Packaging Speed	10-75 bags/min
Power	2.5Kw
Gas Source	0.65Mpa
Air Consumption	150L/min
Weight	500Kg
