

JS-200 Automatic Adhesive Sticker Applicator Beer Wine Water Round Bottle Labeling Machine

The bottle labeling machine is mainly used for semi-automatic labeling of the circumference of various cylindrical bottles in food, daily necessities, agriculture, etc.

High-precision labeling equipment, suitable for product labeling of various sizes, saving labor and improving labeling accuracy and consistency.

Feature

1. The labeling head can be quickly adjusted for bottles of different heights and sizes.
2. PLC and touch screen control panel are easy to operate and can save multiple sets of parameter settings.
3. Cylinder-type labeling mechanism, the label is flat and firm, and does not wrinkle.
4. The use of international brand electrical components, reliable and stable quality, long service life.
5. Miniaturized design, small footprint, suitable for offices, factories, shops and other places.

Specification

Packing Speed	30-40 bottles/min
Labeling Accuracy	±1mm
Label Width	15-150mm
Applicable Product Height	30-240mm
Applicable Product Diameter	Φ30-100mm
Applicable Inner Diameter of Paper	76mm
Applicable Outer Diameter of Paper	Max. 350mm
Machine Size	2000(L)*900(W)*1400(H)mm
Voltage	220V, 50/60Hz
Power	1.2Kw
Machine Weight	200KG
