

SED-16GX Sixteen-Heads Laboratory Automatic Liquid Filling Machine

SED-16GX automatic sixteen-heads liquid filling machine is prepared with international famous brand electrical components. Omron and German Sick Electric have ensured its excellent quality and long-lasting stable performance.

This equipment is designed for the canning of various round bottles and heterosexual bottles. It is the canning host in the canning production line. It adopts the plunger pump canning method, and has the function of no bottle and no canning.

Feature

1. Beautiful and standard design: This series of models has a compact and reasonable design, beautiful appearance, and conforms to GMP design standards.
2. Convenient operation and maintenance: The machine is more simple and convenient in operation, installation adjustment, equipment cleaning and maintenance.
3. High precision: When adjusting the measurement, it can be adjusted in a large range to close to the measurement, and then fine-tuned. It can achieve no filling when there is no bottle or lack of bottle, so the measurement is accurate.

Product Parameters

Name	Sixteen-Heads Laboratory Automatic Liquid Filling Machine
Model	SED-16GX
Applicable Objects	Round bottles such as glass bottles and plastic bottles
Top cover rolling speed	60-80 bottles/minute
Voltage	380V/220V
Weight (kg)	980kg
Overall dimensions (length x width x height)	2160*1200*1500(mm)
Applicable specifications	500-1000ML
