

SED-18FS-B Rice Wheat Turmeric Pulverizing Grinding Machine

This device is a new generation of grinder equipment suitable for pharmacy, chemical, food, etc.

Principle

This device makes use of the relative motion of moved fluted disc and fixed fluted disc to grind materials by the impact and friction of cogs and the materials impact on each other. The grinded materials will enter into collector automatically by the action of rotating centrifugal force; and the dust will be filtered and discharged by cloth-bag. This device is designed with the “GMP” standard and is made of stainless steel.

Product Parameters

Type	SED-18FS-B
Production capacity (kg/h)	10-30
Main-shaft speed (r/min)	5800
feeding granularity (mm)	10
Smash fineness(mesh)	20-120
Smash motor(kw)	2.2
Outline dimension L×W×H (mm)	500×600×1100
