

DPP-250DI

Blister Packing Machine

Introduction:

It has compact and simple structure with stainless steel construction. It can reject the wrong blister automatically. The machine conforms to the requirement of GMP standards completely.

Features:

- Compact and simple structure.
- Stainless steel construction
- Platen sealing
- Automatic rejection of blisters
- Conform to GMP standard
- CE certified

Optional:

- Capsule with orientation
- Safety guard
- Vision inspection system
- Print registration
- Servo motion
- Can be connected to a cartoner

Main Technical Specifications

Max speed(cycles/min)	forming: 50 cycles/min
Forming materials	pvc/pvdc, pet
Lidding materials	ptp, dialysis paper and other
Blister dimensions	width: 250mm, Length: 30-120mm ,Depth:18 mm, 20mm(optional)
Max production speed	200blister/min
Total power	5.7kw 380v 50hz
Air-compressor	≥ 0.22m ³ /min (self-prepared)0.5-0.7mpa
Weight	1500kg
