

Triangle Automatic Packaging Machine

High precision density structure, maintenance and operation are simple.

Introductions:

The machine introduces advanced foreign technology; draw the essence of domestic and imported advanced photoelectric sensor control system. Two bags can be accurate slitting bags. Automatic completion of bag-making, measuring, filling, sealing, cutting, heat-printing codes can divide and can league etc.

Use:

It is suitable for food, chemical industry, pharmacy, condiments such solid packing (such as: nuts, sugar pill, chocolate beans, peanuts, take a left pills, tablets, health product packaging, etc), the automatic completion of bag-making, sealing, counting, more even, the bag hemisected one-off cut.

Technical parameter:

Packing speed	30~50 (bag/min)
Packing size	L:50~100mm W:40~70mm
Packing film thickness	0.03~0.07mm
Max film thickness	180mm
Paper maximum overall diameter	≤φ350mm
Measuring range	15~120ml
Power	1.2kw
Overall dimension	900×720×1600
Weight	300kg
Voltage	220v
