

Vertical Packing Machine for Granule, Large Granule and Tablet

Pharmaceutical, food, daily chemical, agricultural, hardware, building materials and other industries, but also according to customer requirements to provide customized machinery.

Technical features:

The unit is made up of a 5000D/5000B/7300B/1100 vertical filling and packing machine, combined scale (or cjs2000-f weighing machine) and DT2 vertical bucket lifting unit, which integrates weighing, bag-making, flanging, filling, sealing, printing, punching and counting, and adopts servo motor synchronous belt to pull film. Control components are international brand products, performance is possible. Horizontal seal vertical seal using pneumatic, smooth and reliable movement. Advanced design ensures that the machine adjustment, operation and maintenance are very convenient.

Technical parameter:

Range	10-1000g, 100-2000g, 500-5000g, 5000-15000g
Materiel	Granule
Model	full-automatic
Speed	25-80bag/min, 10-50bag/min
Form	in bag
Products	Nuts, puffed food, meat products, frozen food, frozen ribs
