

Linear Liquid Filling Machine DLF-BL/2

Widely used for filling various kinds of liquid products in drink, pharmaceuticals, oil, detergent and etc

- Suit for all kinds of regular and irregular shaped bottles
- Adopt pneumatic and PLC controller with touchable screen on man-machine interface
- Adopting individually controlled cylinder for fast and accurate volume adjustment
- Preventing dripping device and No-bottle no-filling device avoid material leakage
- Install/dismantle simply, easy to clean
- Filling head elevating system preventing high froths.

Technical Data:

Model	DLF-BL/2
Capacity	6000-1000 BPH
Filling Head	2
Filing Volume	500-2500ml
Filling Accuracy	$\leq \pm 1\%$
Power	220V 50-60Hz
Air Supply	400L/Min 5-7Bar
