

Automated High Speed Cartoning Machine Medical Ampoule Packing Machine KW2120

This machine can pack all kinds of medicine plates, traditional Chinese medicine products, ampoule bottles and vials, small long bodies and other regular items. It is also suitable for food packaging, cosmetics packaging and related industry packaging. It can be used in a wide range of applications. According to the different use requirements of users, the products can be replaced regularly, and the mold adjustment time is short, assembly and debugging are simple, suitable for large-volume single-variety production, and at the same time can meet the needs of users in small batches and multi-variety production. The cartoning machine can be exported. Various types of mid-box film packaging equipment are matched.

Technical Parameter:

Capacity	30-120(boxes/min)
Suitable carton dimension(L*W*H)	(70-125)*(35-85)*(15-65)mm
Overall demension(L*W*H)	2000*1200*1700mm
Net weight(kg)	1500
