

Automatic PE Film Shrink Wrapping Machine PM-LW10

This machine is used in the combination package of mineral water, beverage, beer, liquor, infusion bottle and so on. The packing is not needed.

1. Imported European PLC program automatic control, stable performance, precise control.
2. Fully automatic function of automatic feeding, sizing, shrinking and cooling.
3. Thin film conveying is controlled by inductive switch, which can regulate the length of film and reduce the loss.
4. Imported motor frequency conversion control, stepless scheduling.
5. Advanced spiral circulation structure, three layers of insulation treatment, energy conservation.
6. Enhanced cooling channel, the product can be quickly finalized, easy storage and transportation.

Technical Parameter

Model	PM-LW10
Power	22KW
Power Supply	AC220V/380 3PH 50/60Hz
Facility external size	L5850×W4000×H1900mm
Wrappage max size	L600×W480×H350mm
Shrinkage film	PE, PVC, POF
Shrinkage thermo thickness	0.03-0.15mm
Tunnel temperature	160 - 260°can adjust at will.
Max output per minute	8-10 bag / minutes
Facility weight	1T
