

Horizontal Form Fill Seal Machine DXD-180

The DXD-180 horizontal form fill seal machine automatically packages liquid, powder, or granular products into single or double sachets. This sealing machine can perfectly seal the bottom, sides, and top of the bagged product for a standing pouch. With PLC control, the pouch packaging line moves efficiently from bagging the powdered, liquid, or granular product to packing the bags into boxes or cartons. This automatic packaging machine, designed to prevent corrosion, features a glass cover which prevents dust from escaping.

Main performance parameters:

- Capacity: ≤ 60 p/min. (single pouch) ≤ 120 p/min. (double pouches)
- Pouch size: Single pouch 85 x 100mm (min) 180 x 225mm(max)
- Double pouches:(60+60) x 70mm(min), (90+90) x 200mm(max)
- Volume: 200ml (single pouch); 300ml (double pouches)
- Precision: $\pm 1\%$
- Foil ID: $\Phi 70$ -80mm
- Foil OD: $\leq \Phi 500$ mm
- Power source: Three phase AC380V, 50Hz
- Power: 6 KW
- Pneumatic (air-operated)source:0.6MPa clean and stable air source
- Dimensions: 3360 x 1000 x 1550(L x W x H)mm
- Weight: about 2000 KG
