

Corner Labeling Machine

Compared with general labeling machine, our Corner Labeling Machine has its unique performance.

First, the general labeling machine can only realize the labeling of one side of the object, which has achieved the corner labeling at the upper plane and the side plane after research and improvement. On the flat part of the label, the roller is rolled and covered with the label firmly, and the side flat part is brushed and pressed firmly.

The Corner Labeling Machine has automatic photoelectric tracking, no labeling without objects, automatic calibration without labels and automatic label detection functions are better to prevent missing labels and label waste. As a matter of fact, it is stable, thus to ensure high and reliable performance. Due to the proper size and compact design, it realizes the function to ensure easy installation.

Product specification:

Producing speed	1000-6000BPH
Labeling accuracy	±1mm
Label max width	200mm
Label max length	500mm
Bottle min diameter	30mm
Bottle max diameter	100mm
Bottle min height	30mm
Bottle max height	360mm
Label inner diameter	φ76mm
Label outer diameter	φ400mm
Machine size (LxWxH)	3048x1100x1700 mm
Machine power	220V 50Hz 2000W
