

Semi-Auto Capsule Filling Machine DXT-360B/P

This machine is a kind of equipment mixing together with mechanical, electrical, and gas technique, adopts microcomputer programmable controller, frequency control, touch control panel, can independently complete the process of the capsule, sub-capsule, filling, locking, etc., reducing labor intensity and improving production efficiency. The contact parts between the machine and the material are stainless steel, which is in line with pharmaceutical hygiene and safety. The machine is sensitive, easy to operate, accurate filling dose, suitable for filling various capsules, and is economical and practical equipment for filling capsule medicines in the pharmaceutical industry.

Main Feature:

1. Fast, accurate, and reliable.
2. Fills from 10000-25000 capsules per hour.
3. Can operate with capsule sizes 00-5.
4. Meets GMP requirements.
5. Low noise.
6. Safe and easy to operate.
7. Stainless steel construction for durability and hygiene.
8. Easy cleaning, easy maintenance.
9. Only one operator is required, and operating training can be done in 10 minutes.

Technical Specifications

Product Model	DXT-360B	DXT-360P
Voltage & Power	220V/380V 50Hz 4KW	220V/380V 50Hz 4KW
Applicable Capsule	00#-5# Mechanism Standard Capsule	000# 00L# 0L# 00#-5# Mechanism Standard Capsule
Air Pressure	0.4-0.6Mpa	0.7Mpa
Air Flow	>0.1m ³ /Min	0.03m ³ /Min
Vacuum	40m ³ /h	40m ³ /h
Production Capacity	10000-25000 Grains/h	10000-25000 Grains/h
Product Dimensions	L*W*H 1200*720*1600MM	L*W*H 1140*700*1630MM
Machine Weight	350KG	500KG
