

## ZLG series Rotary Granulator Machine

ZLG Series rotary granulator machine is used in the pharmaceutical, food, granule, chemical, solid beverage and other industries to make the stirred materials into the required particles, which is especially suitable for materials with high viscosity. All parts in contact with the material are made of stainless steel, with beautiful appearance, reasonable structure, high granulation molding rate, beautiful particles, automatic discharge, avoiding damage to the particles caused by manual discharge, and suitable for flow operation.

### Technical Parameters

Model		ZLG-150	ZLG-250	ZLG-300	ZLG-400	ZLG-500
Total power	Kw	3	5.5	7.5	19.5	26.5
Capacity	Kg/h	30-100	80-200	100-400	300-1000	400-1500
Granulation diameter	Mm	Φ0.8-5	Φ0.8-5	Φ0.8-5	Φ0.8-5	Φ0.8-5
Cutter speed	R/min	60	0-50	0-50	0-50	0-50
Machine weight	Kg	200	400	600	1350	1750
Dimensions	Mm	700x400	1200x700	1350x800	1780x1120	2230x1440
		x700	x1100	x1200	x1355	x1670
