

Carton Erector YC-FK500

This equipment can be wired or operated as a stand-alone machine. It can automatically suck the box, open the box, fold the bottom, and seal the box with tape. The tape applicator has precise and firm performance, stable operation, long service life and good stability. The standard table height is 630 mm (other requirements can be customized) according to the needs to widen and heighten the equipment. It is manufactured with advanced technology, the structure is firm and durable, and the high-quality electronic and pneumatic components are used.

Features:

Manually adjust the width and height. After the box is placed in the storage rack vertically, press the start button, the suction cup will automatically go to the storage rack to suck the box, fold the front and rear covers, fold the left and right covers, and automatically push in the tape applicator. The box is introduced and sealed by the conveyor belt to complete one time without manual intervention. The operation is highly automated, and the two conveyor belts are driven left and right.

Technical Parameters:

Model	YC-FK500
Applicable Carton Size	L280-500mmW 160-400mmH 180-400mm
Transfer Speed	20m/min
Unpacking Speed	5-10cartons/min
Equipment Size	L2070*W2040*H1470mm
Applicable Power	220/380V50Hz
Maximum Power	0.18kw
Applicable Pressure	6kgf/cm ²
Tape Width	48/60/75mm
Equipment Weight	495kg
