

## Vertical Form Fill Seal Machines TWIN3

This standard but very functional vertical form-fill-seal machine was created based on TAM's pursuit of exceptional film feeding and sealing performance. When the machine is running, operators can view the operating status and monitor the temperature, pressure, and closure location on the sealing bar.

Both continuous and intermittent model are available based upon requirements.

### Specifications:

|                           |                             |                          |
|---------------------------|-----------------------------|--------------------------|
| <b>Bag Size Range</b>     | Intermittent type           | Bag Width : 65 - 250mm   |
|                           |                             | Bag Length : 50 - 300mm  |
|                           | Continuous type             | Bag Width : 65 - 250mm   |
|                           |                             | Bag Length : 100 - 300mm |
| <b>Packaging Speed</b>    | Intermittent type           | Max. 100bpm              |
|                           | Continuous type             | Max. 140bpm              |
| <b>Machine Dimensions</b> | W 1184 x D 1846 x H 1600 mm |                          |
| <b>Machine Weight</b>     | Approx. 900 kg              |                          |
