

CH-100/200 GMP Standard Pharmaceutical Touch Mixer

The machine is stainless steel horizontal channel mixer, in the pharmaceutical, chemical, food industries for mixing powder or paste materials.

By mechanical rotation, the S-type impeller rotating, flipping back and forth to promote the material and mix, operation, use of electrical control, mixing time can be set to automatically shut down, thereby improving the quality of each batch of mixed material.

Technical Parameters:

Model	Blade shape	Working volume	Mixing speed	Stirring angle	Stirring power (KW)	Batch turning power	Overall dimension	Weight
		(L)	(r/min)			(KW)	(mm)	(kg)
CH-100	S type single screw	100	24	<105°	2.2	0.55	1380×600×1000	400
CH-200		200	20		4	0.75	2000×650×1200	450
