

Mixer Granulator for Making Granules GHL-10

It is suitable for pharmaceutical, foodstuff, chemicals industry and so on. The granule is made from power to damp granule in which the adhesive should be injected in it.

Features:

1. The machine adopts horizontal cylinder structure, reasonable structure, no dead corner.
2. Air filled seal shaft for to drive. When washing, it can be changed to water.
3. Fluidity granulation, the granule is around ball shape. Its fluid is good.

Technical Parameters:

- Model: GHL-10
- Volume(L): 10
- Mixing speed(r/min): 300/600
- Dimension(L*W*H): 1530*620*1620mm
- Weight: 400kg
