

## Jar Labeling Machine

The Jar Labeling Machine is equipped with advanced process, which has longer service life for use and there is no special need of maintaining. Due to the powerful function, it can be switched arbitrarily, and the distance between front and back double label can be adjusted flexibly. Compared with ordinary product on the market, it can realize labeling at a specified position on the circumferential surface, and the label positioning accuracy is high.

Due to the advanced configurable online coding function, printing production batch number and date at the same time, our Jar Labeling Machine can simplify packaging process, thus to improve efficiency. The main material of the equipment is stainless steel and high-grade aluminum alloy, the structure is firm, and it meets the GMP production requirements, with high and reliable performance.

### Product specification:

Producing speed	1000-8000BPH
Labeling accuracy	±1mm
Label max width	200mm
Label max length	500mm
Bottle min diameter	30mm
Bottle max diameter	80mm
Bottle min height	30mm
Bottle max height	360mm
Label inner diameter	φ76mm
Label outer diameter	φ400mm
Machine size (LxWxH)	3048x1250x1500 mm
Machine power	220V 50Hz 2000W
