

QGF series 3 gallon/5 gallon barrel water production line

QGF series type barreled filling line is the core part machine for 3 gallon and 5 gallon barreled drink water production line. Is the ideal machine for mineral water, steam water and purified water production line. With rinsing filling and capping three functions in one body machine, adopt cylinder capping, and CAP recycling valve. All liquid touch parts by stainless steel 304 pipes. Main electrical element adopt Mitsubishi, OMRON product, air channel adopt imported AIRTAC product. The spray muzzle for barrel inside and outside rinsing use imported American spray company unique technical. It is compact structure, high work efficiency and stableness, High robotic zed, with machine, electric and air 3-in-1 matched machine for automatic barreled production line.
