

Double Lane High Speed Packing Machine SL520D

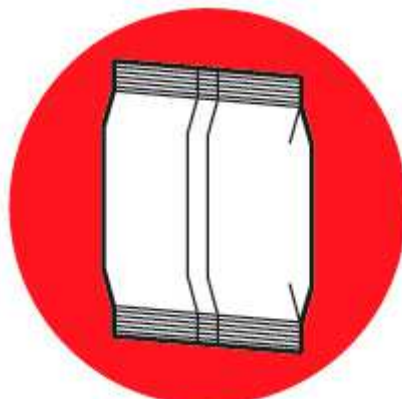

The scope of application

This machine is suitable for extruded food, fruits and vegetables, candy, biscuits, dried fruit, melon seeds, roasted seeds, seeds, color master batch, moisture-proof beads, desiccant, coffee, soy milk powder, sugar, monosodium glutamate, tea and other granular, powder and liquid materials automatic packaging.

Main Features:

1. Double bag forming and double finished product output devices, fast and efficient, low investment and high return.
2. Servo motor pull bag, fast, smooth and reliable;
3. LCD touch screen, easy and intuitive control;
4. PLC control components are used international brand-name appliances, reliable performance;
5. Advanced design ensures that the packaging machine is suitable for different industries, convenient adjustment, operation and maintenance, also can be combined with domestic and foreign different measurement equipment.

Packaging bags:

Technical parameters:

Machine type	SL520D
Fastest packing speed	100-150 bags / min
Filling amount (ml)	100-500
Bag form	Backpack bag
Bag size (mm)	Bag width 70-120
	Bag length 60-220
Maximum film width (mm)	520
Packaging film material	Composite film, aluminum film and so on
Power supply	220V 50HZ
