

Automatic Packaging Machine Combination series JR-420E/520E

JR-420 With liquid pump, the product suitable for all kinds of liquid package, including automatic packaging machine soy sauce, peanut butter automatic packaging machine, hot pepper paste automatic packaging machine, automatic packaging machine hot pot, tomato sauce automatic packaging machine, etc.

The bag-making mode of the product is automatic bag, you only need to provide the volume membrane and liquid, together with our automatic liquid packaging machine, you can complete the packaging market.

Features:

- The system can finish automatically all processes ,i.e feeding, measuring, filling and bag making printing date, product output
- High measuring accuracy, high efficiency.
- Save labor, less waste, easy operation and maintenance
- Microsoftware control system, adopting the double vibration feeder, easy operation

Technical Parameters:

Project	Content
Packing speed	About 50 bags / min depending on the packaging film quality and material to determine.
Measurement accuracy	$\leq \pm 1.5\%$
Bag size	(L)60-300mm (W)90-200mm
Maximum packaging film width	420mm
Bag form	Packaging materials with the film, the machine automatically for the closure of the bag, under the seal plus the back seal.
Membrane thickness	0.06-0.09mm
Packaging Materials	BOPP/CPP, PET/AL/PE and other hot composite materials
The whole gas consumption	0.8Mpa 0.5m ³ /min
