

FH-4G Automatic Piston Type Filling Machine

FH-4G series piston type, filling and sealing all-in-one machine, the structure is compact and high degree of automation, so it can have mass assembly line work in a small space. The filling system all adopts import pneumatic element FESTO, which the machine has powerful motive power and high reliability in filling different high viscosity liquid products. In the machine all the contact surface and corner piece with liquid, the roughness reach 0.5um, correspond GMP standard.

TECHINECAL SPECIFICITIONS

Capacity	0-40Bottle/min
Accuracy	±2ml
Sealing rate	99%
Pressure air consumption	0.3m ³ /min
Power	1Kw
Filling Range	50ml 125ml 250ml 500m
Barometric	0.6Mpa
Voltage	220/380V
Net Weight	800kg
