

Legacy 6100 / *Tableting Machine*

- Single Rotary press with output upto 400,000 tablets per hour
- Fully automatic weight control with Single tablet Rejection capability at rated RPM
- Unique 3 paddle force feeder design with MUPS kit extension available
- Robust design for versatile processing
- Interchangeable Turret with swing out arm
- Parameters control by IPC

Legacy 6100, a single rotary High-speed tablet press is built for consistently delivering good quality tablets. The Legacy 6100 is designed to meet your quality and regulatory needs and has the flexibility to adapt to the stringent requirements of a demanding and dynamic pharmaceutical market. A tablet press with cGMP features, better accessibility to the compression zone, virtually tool free changeover and improved revenue optimization.

The Legacy 6100 brings high speed, fully automated operations, providing cost effective solutions to the pharmaceutical industry. With 21 CFR Part 11 and audit trail compliance, it fulfills all the requirements prevailing in regulated markets. The Legacy 6100 is conceived by world-class designers and crafted with high-quality precision engineering to deliver you with better value through innovation.

Features

- Single Rotary press
- Fully automatic weight control
- Single tablet Rejection capability
- Unique 3 paddle force feeder design
- Robust design for versatile processing
- MUPS kit extension available
- Interchangeable Turret
- Parameters control by IPC
