

Industrial Granule Snack Food Triangle Bag Packaging Machine CK-380K-S

The granule snack packaging machine is a kind of fully automatic packaging machine, the finished product with beautiful appearance. This triangle bag packing machine can be used for different products, such as coated peanut, candy, chocolate beans, beans, etc.

Triangle Bag Packing Machine Features:

- The snack packaging machine can automatically complete the measurement, bag making, filling, sealing, printing production date, counting, etc.
- The control system adopts Mitsubishi PLC+ English display, which has stable performance, strong anti-interference ability and fault self-checking function, which makes the operation simpler.
- The snack food packaging machine uses embedded sealing, reinforced heat sealing mechanism, intelligent temperature controller temperature control, good thermal balance to adapt to various packaging materials.
- The bagging system is controlled by a stepper motor. The system has high characteristics, low noise and long life, there is no need to adjust other components, just change the parameters on the display to change the length of the bag, and it is accurate.
- The contact part of the triangle bag packing machine with the material is made of 304 stainless steel, which is clean and hygienic and fully meets the national food hygiene standards.

The technology of the snack packaging machine is advanced, not only can effectively improve the production efficiency of the factory, but also can reduce the production input and maximize the profit. Our triangle bag packing machine have been exported to different countries around the world. And we will test the machine before shipment to ensure the quality and performance of the machine.

Model	CK-380K-S
Packaging Materials	OPP/CPP OPP/PE NILO/PE PE
Maximum Metering Range	Max40ml
Bag Size	W40-105mm; L30-85mm
Packaging Speed	20-60 bags/min
Maximum Width Of Roll Film	320mm
Voltage	220VAC/50HZ
Power	2KW
Size	L900*W900*H1800mm
Weight	250KG
Precision	±1%
