

## *Shrink Sleeve Labeling Machine HTB-250*

### **Product Features**

1. The standard position precision is high, and shrinkage can highlight the perfect shape of bottle.
2. High and stable mechanical structure of the whole machine adopts stainless steel protection box cover and aluminum alloy rigid frame, solid doesn't rust.
3. High quality positioning accuracy: all mechanical transmission design, using force set timescale, and various membrane materials 0.03mm-0.13mm film thickness, membrane material applies 5-10 range inner diameter can be adjusted.

### **Technical Parameters:**

Host machine	24400*900*2200mm
Voltage	380/220VAC
Speed	250BPM
Applicable length of bottle body	28-125mm
Applicable thickness of label	0.03-0.13mm
