

Cup Sealing Machine JY-608

Cup sealing machine can automatic and manual mode switch, more flexible and convenient operation, is widely used in milk tea shop, coffee shop, beverage shop, etc.

Feature

1. Cup sealing machine is automatic and manual mode switch, more flexible and convenient operation.
2. Cup sealing machine is microcomputer control.
3. Cup sealing machine can Accurately counting.
4. Cup sealing machine has safety door protection.
5. Cup sealing machine has precision splint design.
6. Cup sealing machine has adjustable tray.

Principle

The heating aluminum disc at a certain temperature presses the positioned sealing film to the plastic cup, the sealing film fits the rim of the cup tightly and seals the cup. At the same time, the cutter at the periphery of the heating disc cuts off the sealing film along the outer rim of the cup. The cut off circular sealing film seals the opening of the cup completely to form a separate sealed cup.

Procedure

1. Put the plastic cup into the cup mold.
2. The cup will be fed automatically at set time for sealing. (if manual operation it need to press the button manually)
3. It will extend automatically after sealing is well done.
4. Left film frame automatically winds up the film.
5. Take out the sealed cup.

Technical parameter:

Model	JY-608
Cup sealing speed	400-600 cups/ h
Material	painting
Voltage	220V 50HZ/ 110V 60HZ
Power	450W
Cup caliber	95/ 90/88mm
Maximum cup sealing height	20CM
Cup material	Paper cup and plastic cup
Dimension	370*320*590mm
Weight	27KG
Optional color	Black and white
