

Semi-Automatic Granule Particle Filling Machine 2DC-6K

This machine is suitable for quantitative filling of granular, mixed granular products. Such as: pesticides, fertilizers, feeds, medicine granules, premixes, snack foods, sugar cubes, peanuts, salt, monosodium glutamate, seeds, grains, hardware etc.

Features

1. PLC control, easy to understand
2. High precision electronic scale weighing, high precision
3. All stainless steel structure, easy to clean and corrosion resistant
4. Manual bagging, photoelectric induction cutting
5. Each scale is fed by double vibrator or pneumatic gate, fast speed and high precision
6. Automatic calibration after turning on the electronic scale
7. Weight tolerance alarm, weighing error can be automatically corrected
8. Vibrator amplitude voltage adjustable

Technical Data

Model	AT-2DC-6K
Measuring range	500-6000g
Packing speed	0-20 bags/min
Packaging accuracy	±(0.2%-0.5%)
Power supply/power	AC220V/50Hz/500W
Dimensions	128×110×230 (cm)
