

FF-A450L Cutting and Shrink Wrapping Machine

FF-A450 is semi automatic cutting and shrink wrapping machine is manual operation. The cutting and shrink wrapping machine works with the shrinking machine BS-4525 BS-4535 for various small products packing film shrinking such as the dishes and the phone carton box. The cutting and shrink wrapping machine cuts and seals the packing film three sides on the packages, then the packages will go into the shrinking machine 1.2 m length channel. After shrinking and cooling, the packages will come out. Easy operation. It is easy movable with four wheels to work for production line. It can work for most of the packages.

POF environmental friendly heat shrinkable film is the abbreviation of biaxially oriented polyolefin shrinkable film. It is one of the most advanced environmental protection plastic packaging materials in the world. Products are widely used in food, medicine, health care products, stationery, cosmetics, handicrafts, books and periodicals, audio-visual products, electrical accessories, machines, toys and other heat shrinkable packaging materials. The product adopts advanced biaxial drawing three-layer melting co extrusion process. The soft shrinkable film with high transparency, high shrinkage, high toughness, high heat sealing performance, antistatic and cold resistance is produced. This product is suitable for semi-automatic or automatic shrink packaging machine.

Technology data sheet:

Model	FF-A450L cutting and shrink wrapping machine i
Power Consumption	1KW
Packing Max Height	14cm
Max Cutting Size	(L)56*(W)45cm
Packing Speed	10-20 pcs/min
Voltage	220V/ 50Hz
Machine Size	(W)70cm*(H)118cm*(L)160cm
Air Presser	4kg/cm ³

Model	BS-4525	BS-4535
Shrinking Material	PVC, POF, PP etc	
Power Consumption	6.5KW	
Loading Weight	10kgs	
Transfer Speed	0-10m/min	
Machine Size	1200mm*700mm*1000mm	
Voltage	380V	
Max Packing Size	450mm*250mm	450mm*350mm
Gross Weight	80kgs
