

Bottled Mineral Water Filling Line XGF16-16-5

This machine works harmoniously with air-conveyor belt, It holds the bottles by the neck, thus, reducing the possibility of bottles falling over during conveying process. This machine is used to fill still water into pet bottle and with screw caps capping function.

This machine integrated three function:

1. Rinse the empty pet bottle
2. Filling the rinsed bottles
3. Capping the filled bottles

Technical Parameter:

Model	XGF16-16-5
Production Output	5000 ML capacity 1,800BPH
Rinsing heads	16pcs
Filling nozzles	16pcs
Capping heads	5pcs
Suitable to PET bottle Size	Bottle volume from 2000 to 20000ml
Washing Water Required	1500 liter per hour
Washing Pressure Required	0.25Mpa
Working Power	380V AC 3-phase
Compressed Air Pressure (for caps arranger)	0.7MPa
Compressed Air Consumption (for caps arranger)	0.8m ³ /min
Control Panel Power	24V DC
Filling Pressure	Normal pressure (gravity)
Machine Size	2850 x 2150x2700mm
Gross Weight	4200kg approximately
Total Power	3.8KW
