

HLKIS-4 Semi-automatic Vacuum Tray Sealing Machine

Equipment function:

People put in box - automatic seal, cutting film -printing-people take out box

Principle capability and features:

Desktop pneumatic seal cup machine can be quickly replaced template and sealing device. this machine adopts Japan's OMRON PLC programmable logic controller.intelligent digital temperature control. OMRON relay. Taiwan AIRTAC cylinder stable and durable equipment. machine covers area is small. with automatic detection of the cup(box). the machine is automatically reset when the dangerous operation, color of pattern, inflatable, sealing, cutting film.a complete collection of waste film, and other functions; machine made of stainless steel and aluminum alloy. with food hygiene requirements.

Technical Parameters:

Model	HLKIS-4
Temperature scope	0-300°C
Voltage	AC380/3KW
Capacity	1200cups/h , 4 trays/once
Outer size	1000*1300*1500mm
Working pressure	0.6-0.8Mpa
Whole machine weight	300kg
