

Rotary Tablet Press ZPW-15D

Rotary Tablet Press ZPW-15D is a tablet pressing machine with automatic rotation and continuous tablet pressing. It can press all kinds of granular raw materials into tablets, but not suitable for pressing semi-solid, moist powder or non-granular superfine powder. It is mainly used in pharmaceutical, chemical, ceramic, food, electronic, plastic and powder metallurgy industries.

Specifications

Model	ZPW-15D
Punch quantity (set)	15
Max. tablet pressure (kN)	60
Max. tablet diameter (mm)	22
Max. tablet thickness (mm)	6
Max. filling depth (mm)	15
Max. production capacity (pc/h)	35
Depth of middle punch (mm)	22
Diameter of middle punch (mm)	34
Diameter of upper and lower punch (mm)	26
Length of upper punch (mm)	115
Length of lower punch (mm)	115
Machine's coverage area (mm)	615*890
Machine height (mm)	1,415
Machine weight (kg)	1
