

## *KZJ-180 Full Automatic Film Baling Machine*

The machine adopts PE film tapes to carry out automatic counting, palletizing and baling of many pieces of objects so as to save materials and energy to the utmost extent. It is widely used for automatic assembly packaging of many pieces of objects in medicines, food, stationery commodities and other industries, and especially has wide application in injections of the pharmaceutical industry.

The machine is made of stainless steel, complying with GMP requirements. It adopts the PLC control system and man-machine operation interface. The quantity of objects to be baled can be freely adjusted. 30-80mm wide film tapes can be freely selected to save materials and energy to the utmost extent. With stable running, simple operation and convenient maintenance, the equipment can complete the replacement of products of different specifications within 20 minutes. It can be used individually, and can also work with equipment at front procedures (such as the c cartooning machine, inkjet printer, weighting machine, and etc.). It is a preferred piece of equipment for replacing medium box packaging in the industry.

### **Technical Parameters**

<b>Overall dimension (L × W × H)(mm)</b>	2400 × 750 × 1950
<b>Maximum package dimensions (mm)</b>	200 × 130 × 280
<b>Minimum package dimensions (mm)</b>	50 × 50 × 30
<b>Strapping rate (bag/min)</b>	8-15
<b>Working air pressure (mpa)</b>	0.5-0.6
<b>Power supply</b>	220V 50Hz
<b>Power (w)</b>	120
<b>Displacement speed (m<sup>3</sup>/min)</b>	0.2
<b>Weight (kg)</b>	450
