

SJQ type automatic rubber plug cleaning machine

Purpose and brief

This machine is of vial for rubber plug cleaning equipment. Be cleaning the rubber plug into the drum through the water and ultrasonic processing rough wash drainage drainage - Wash - water drainage - Leaching - vacuum exhaust - silicon - hot air drying and other processes, the rubber plug is sufficiently cleaned, finally the rotating drum will plug in all into oblique's output.

Main technique parameters

Production capacity: 20000 ~ 120000 (7ml / batch vial stoppers.)
Application of rubber plug: 7ml bottle stoppers, 4ml or 7ml bottle of Lyophilized type rubber plug, a transfusion bottle butyl rubber plug
Ultrasonic power: 1Kw ~ 2Kw
Power source: 380V 50Hz
Power rate: 4Kw ~ 6Kw
Dimensions: determined according to the output
