

Powder packing machine KF02-PD

Main performance and structural features:

Automatic packaging machine is my company newly developed the manufacture of computer-controlled bags, vertical; three sides, four sides sealed; flat bags, pillow-shaped bags, intermittent packaging machine. Can automatically complete the measurement method, suitable for better mobility of granular materials, small bags.

Features:

- Computer program control, simple operation, easy maintenance, stable performance, reliable quality and so on.
- Packing speed stepless speed regulation.
- The use of unique bag length control technology, bag length stepless adjustable. Bag length is accurate, easy to adjust.
- Intelligent temperature controller, thermostat can control the temperature of the heat seal to ensure that the quality of sealing.
- Replace some parts. Can be achieved three side seal, four side seal, flat bag, pillow bag production.

- Unique photoelectric positioning technology to ensure that the color of the standard bag design integrity.
- The amount of packaging in the rated range stepless adjustable.
- Automatically print the product batch number, easy to tear, easy to use.
- The appearance of the machine generous, all stainless steel structure, in line with food and medical packaging health requirements, suitable for food, medicine and chemical industry.

Technical Parameters:

Model	KF02-PD 240/320/350
Sealing style	three/four side sealing, back sealing, rounded corner
bag-making length	30-150/180/280mm, can be customized
Bag-making width	30-110/140mm, can be customized
Packing capacity	50g/100g/200g, can be customized
Packing speed	15-70 bags/min
Filling method	Screw filling
power	1.5KW
Overall Dimension	760×980×1800mm
Weight	300KG
