

ZS-GP631W Semi-automatic Gear Pump Bottle Filling Machine

The weighing and filling machine controls the panel to pump liquid. The electronic scale detects the weight in real time and send the signal back to the system. The pump will stop to work immediately after reaching the set amount. This kind of filling method can reduce filling error greatly. It is widely used in medicine, chemical industry, food, and beverage, wine, industrial oil, cosmetics and other industries, but please notice that this machine is not suitable for filling water.

Technical Parameters:

Model	ZS-GP631W
Machine Power	220V/110V 50-60Hz 210W
Machine Pump	Gear Pump
Max Flow Rate	8L/min
Filling Range	50mL-8L
Weighing Range	50g-10kg
Suitable Liquid Temperature	<90°C
Repetitive Error	±10g
Filling Nozzle Diameter	Φ12mm&Φ19mm
Hose Diameter	12mm(ID)/16mm(OD)
