

## *SGD500B Lollipop Depositing Machine*

SGD500B full automatic servo driven PLC controlled continuous depositing line is the most advanced and specially designed depositing machine for lollipop production. It mainly consists of auto weighing and mixing system (optional), pressure dissolving tank, micro film cooker, depositor, stick insert system, demolding system and cooling tunnel. This line has the advantage of high capacity, accurate filling, and accurate stick insert position. Lollipop produced by this line has attractive appearance, good taste.

### **Technical Specifications:**

<b>Model</b>	<b>SGD500B</b>
Capacity	450-500kg/h
Candy Weight	As per customer requirement
Depositing Speed	30~35n/min
Steam Requirement	400kg/h, 0.5~0.8Mpa
Compressed air requirement	0.25m <sup>3</sup> /min, 0.4~0.6Mpa
Working Condition	Temperature : 20~25°C ; Humidity : 55%
Total power	45Kw/380V
Total Length	16m
Gross Weight	4500kg
