

## FGJ-1/4 Automatic Single Head Can Seamer

The seamer is mainly used to seal pop-top can of tinfoil and aluminum alloy and PET can. It has four sealing positions with the seal component. Can revolve and circles around the main spindle when seamer is sealing.

It has function of feeding cap when can is ready, not feeding cap when can is not ready. And it is installed with automatic stopping system which acts when a can is blocked at the inlet, or the cap runs out in the cap holder. So the seamer is the ideal equipment for canned food factories and canned drink factories.

### Technical Parameter

Model	FGJ-1	FGJ-4
Capacity(Cans/Hour)	2000	6000-8000
Number of sealing heads	1	4
Can height(mm)	50-133	
Can diameter(mm)	52-100	
Power(Kw)	0.75	4
Overall dimensions (L×W×H)	930×700×1850	1530×1680×1980
Weight(Kg)	500	2600
