

Automatic Sealing Machine BWFGJ250

The equipment is a new generation tinfoil pop can seaming machine (sealing machine) designed and manufactured by our company through referring to advanced same products in the world according to the actual situation in domestic food, canning factories, and beverage plants. As the machine head structure is simplified, the adjustment and maintenance become more convenient. Generally, the employees who have undergone short-term training can operate it skillfully. Especially the improved curve sealing cam makes the sealing quality apparently better than other same products. The production adopts frequency conversion speed adjustment with touch screen operation. In addition, it is provided with such features as no cap feeding in case of no can, and alarm of cap shortage. The appearance design of full stainless steel materials fully complies with food and sanitation requirements. Furthermore, the steam jetting device and remote control system can be equipped according to customer requirements. It is currently one of the advanced seaming devices in the country

Technical Parameters:

MODEL	BWFGJ250
THE NUMBER OF CAPPING HEAD	4
PRODUCTION CAPACITY	30~250 CANS/MIN
CAN DIAMETER	Φ52.5~99 (SPECIAL:105)
CAN HEIGHT	39~160MM
POWER	5.5KW
WEIGHT	1500KG
DIMENSION	2200X1200X1900MM
