

Filling Machine for Liquid TOPY-LFM

This type of machine is suitable for filling viscous, inviscid, and corrosive liquid. It's widely applied in plant oil, chemical liquid, and the daily chemical industry. It adopts linear type filling, electromechanical & instrumental integration control.

- The machine is suitable for connecting to a whole production line.
- Quality is reliable, simple operation and durable, it is the ideal equipment for liquid filling.

Parameter:

Model	TOPY-LFM
Filling speed	30-60 bottles/min(customized)
Filling accuracy	±1%
Filling type	Piston type
Power	3KW 220V/380V
Control	Simen PLC+Touch screen
Machine size	1500*800*1800mm
Quantity of filling heads	4/6/8/10/12(customized)
Filling range	250-2500ml
