

GX200 High Speed Capping Machine

GX200 high speed capping machine is a linear capping machine designed for capping of plastic bottle, glass bottle, PET bottle etc. This is a new generation capping machine especially designed for solid line, liquid line and production lines. This machine overcomes the disadvantage of low capping capacity, untightening of caps and small application range. It's also superior to rotary capping machine for its frequent changeovers.

Features:

- Capping speed up to 300 BPM
- Adjustable cap chute for different sizes of caps
- Variable speed control
- PLC control system
- Rejection system for improperly capped bottles (Optional)
- Auto stop and alarm when lack of cap
- Stainless steel structure
- Tool-free adjustment
- Optional cap feeding system: elevator or vibrator

Technical Parameters:

Model	GX200
Capping Speed	50-300 bottles/min
Diameter of bottle	30-160mm
Height of bottle	50-250mm
Cap feeding type	Elevator
Power supply	220/380v, 50-60HZ
Power	1200w
Dimension	2400*900*1600mm
Weight	450kg
