

MIC 8 Head Semi Automatic Small Scale Beer Bottling Equipment

MIC V02 Semi automatic Small Scale Beer Bottling Equipment is in the digestion and absorption of advanced foreign and domestic semi automatic beer glass bottle filling capping machine on the basis of independent development of the bottle filling, capping unit.

This machine adopted negative pressure or isobaric filling system, suitable for beer, wine and etc. It has the characteristics of filling reposefully, high speed, liquid level control, capping reliably, frequency conversion timing, less material loss. It can equip CIP system according to the customers' request. It is the preferred equipment for the small breweries.

A beer bottle filler is a specialized piece of equipment designed to fill beer bottles accurately and efficiently. These machines are commonly used in breweries, beverage plants, and other facilities where large quantities of beer are produced.

As a manufacturer of beer bottle fillers, we provide a variety of machines to meet different production needs. Our machines are designed with advanced technology and made of high-quality materials to ensure durability and reliability.

Automatic beer bottle filler is a type of beer bottle filling machine that is designed to automatically fill a large number of bottles quickly and accurately. These machines are ideal for high-volume production facilities that require a high output of bottles filled per hour. Our 8 head beer bottle filler is an example of an automatic beer bottle filler that can fill up to 3000 bottles per hour.

Overall, a beer bottle filler is an essential piece of equipment for breweries and beverage plants that produce beer in large quantities. As a manufacturer of beer bottle fillers, we offer a range of

machines to meet different production needs, from small-scale breweries to large-scale production facilities. Our machines are designed to be efficient, reliable, and easy to operate, ensuring that our customers can produce high-quality beer with ease.

Technical Parameters

Power	0.3Kw
Filling heads	4-10 heads
Capping heads	4-10 heads
Production capacity	200-800 CPH
Bottle diameter range	Φ50-90mm
Bottle height	150-300mm
Dimension	2000*700*2000mm
Weight	150Kg
