

## ***XT-FJ30 Automatic linear Nutritional Protein Powder Filling Sealing Machine***

This machine has reasonable design, easy and convenient in changing product and cleaning the machine. Packing weight can be stepless adjusted, automatic alarms when fault happens. Adopts PLC control, anti-interference and stable operation, can realize filling, cap loading and capping automatically without human contact. It is widely used in food, pharmaceutical, chemical and scientific industry, etc.

Applicable to pesticides, veterinary drug, premix, additive, milk powder, starch, condiment, fodder, nutrition powder, washing powder, black sesame seed powder, coffee powder, penicillin powder, bingpeng powder, collagen, flour, dye, etc powder, granular quantitative packaging.

### **Features:**

1. This filling and capping machine is integrated with machine, electricity, photoelectric, automatic quantitative, automatic filling, automatic counting error, automatic cap loading and automatic screw capping.
2. PLC control, Chinese and English touch screen language, suitable for different customer using habit, easy operation.
3. High filling precision, adopts spiral material drop and servo measuring system.
4. Suitable for can, bottle type powder quantitative filling.
5. Full automatic in whole process, no need human contact.
6. The part which contact with filling material is adopt GMP requirement material.
7. Transparent material hopper, material state can be easily seen.
8. The capping head can be changed to suitable for different kind of bottles.
9. PLC touch screen control system, Chinese and English interface, easy and convenient to operate.

**Technical parameter:**

Model	XT-FJ30
Filling head	4 heads
Filling material	Flour, powder granular which has fluidity
Filling speed	50-60 bottles/min
Filling precision	$\leq \pm 1\%$
Hopper volume	40L(standard)
Power	1390W
Voltage	AC 380V
Weight	1400KG
Dimension	2400*830*1800(L*W*H)
