

Jam Filling and Sealing Machine

This jam filling and sealing machine is the main part of jam production line, and it is mainly used for filling, capping, and sealing 30-500ml bottles.

It integrates filling and sealing into one body, and it is easy to change bottles. It is mainly comprised of cylinder filling device, capper and sealing sector.

Features:

1. Reliable performance, good filling control capacity, no leakage, small space occupation, and high filling speed.
2. One-button operation system ensures easy control of the jam filling and sealing machine.
3. Many components are detachable, and there is no need for special maintenance.
4. Advanced design, compact structure, and easy to change bottles.

Main Parameters:

Production Capacity	2000~3000 bottle/hour
Bottle Size	100~750ml glass or plastic bottle
Package Accuracy	+/-1%
Sealing Rate	≥99%
Power	2KW
Electric Supply	380V/50hz, 3phase
Size	2500×900×1600
