

CX-125N Cartoning Machine

This machine is specially used for cartoning pharmaceutical bottles such as: ointment. Aluminum bottle and plastic bottle. The machine could fold the leaflet, open the carton and form ointment bottles automatically, these actions could be finished by synchronization, the machine also could make the code printing on the cartons. The machine is controlled by PLC.

Speed frequency transformer, machine interface and touch screen operation system, it will show the cartoning speed and cartons counting. The machine is versatile for cartoning many carton sizes within the permitted range by adjusting and without changing parts. The machine is also equipped with automatic detecting system, it could reject the inferior carton and stop machine by positioning. The touch screen can show the problem and solution of elimination.

It is widely used for different packing including drug, food, commodity and cosmetic. For drug industry such as: cover box for solid tablet and capsule, soft box for liquid paste, grease and colloid, tray box for vial, ampule bottle, and injector, as well as bottle box for solid and liquid drug and bag box for powder and grain products. For food field such as: carton for cans, sweet, chocolate, candy, biscuit, wine, and freezing food, and so on. For commodity and cosmetic industry such as: carton for cream, grease, lotion, colloid, toothpaste, soap, lamp, computer floppy disk.

Technical Parameters

Specification Of Machine(mm)	3000×1100×1600mm
Packaging Dimension(mm)	(L)60-120×(W)28-80×(H)28-55
Packaging Speed	40-100 Boxes/min
Air Consumption	5-8 L/Min
Total Power	1.5kw
Voltage	220V/380V/50Hz
Weight(about)	950kg
