

XJS-AW-BL Noodles Packing Machine

Noodles packing machine is suitable for packaging wet noodles, dry noodles, dough or large pieces of materials, saving labor costs and improving packaging efficiency. This type of Automatic Packaging Line can be connected to a noodle machine to achieve full automation, and the feeding capacity and method can also be selected according to the weight of the customer's packaging materials.

Customization Services

Our team offers personalized customization services to meet specific customer needs.

Options include:

- **Machine Size and Capacity:** Customizable to match production volumes and space requirements
- **Material Handling:** Tailored designs for handling delicate or irregularly shaped noodle products
- **Integration with Existing Systems:** Seamless integration with existing production lines and workflows
- **Special Features:** Additional options such as labeling, date stamping, and quality control systems

Parameters

Model	XJS-M-420
Structure	SS304
Max. Film Width	Max.420mm/16.54"
Bag Width	50-200mm
	1.97"-7.87"
Bag Length	50-250mm
	1.97"-9.84"
Film Material	Laminated and Single-layer
Packing Speed	10-60 bags per min
Air Consumption	0.36 m3/min, 0.6Mpa
Roll Film Size	Inner diameter: Φ75mm/2.95"
	Max. outer diameter: Φ400mm/15.75"
Power Supply	220V, 50HZ, 3KW
Net Weight	450Kgs
Dimension	1390x1070x1290mm
	54.7"x42.13"x50.79"
