

DQFXC5050 Automatic Carton Sealer (side belt conveyor)

DQFXC5050 fully automatic left and right drive case sealing machine, this type of case sealing machine uses pneumatic device (need to connect air source), when the size of the carton changes, the width and height are automatically adjusted, which is economical and fast, and can complete the upper and lower sealing actions at one time. The automatic carton sealing machine also adds the function of width and height positioning. This function can be selected when encountering batches of cartons of the same specification, which can effectively improve work efficiency.

Specification:

Model	DQFXC5050
Power supply	220V/50-60HZ, 1phase
Width of adhesive tape	48, 60,mm
Max. packing dimension	500(W)x500(H)mm
Min. packing dimension	130(W)x120(H)mm
Air pressure of working	0.5 MPa
Loading weight	25Kg
